I am an enthusiastic and highly motivated Solidity Developer, possessing a strong interest in the Blockchain world and a strong desire to develop, learn, and gain experience in a collaborative setting. My key skills include excellent problem-solving, great communication, and an aptitude for quickly learning and understanding new concepts. I am confident that my strong knowledge of Solidity will allow me to contribute value to any team I am a part of. Furthermore, I possess a broad array of other applicable skills, including dynamic public speaking, ethical team-player-ship, excellent time management, conflict management, high-performance collaboration, and leadership communication skills. I am also a self-starter with a great attitude and a dedication to improving my skills and knowledge on a daily basis.

EXPERIENCE

I possess a diverse set of coding and development skills that I have acquired through a variety of experiences, including completing specialization courses on Coursera from top universities and obtaining knowledge in soft skills such as high performance, leadership, ethics, and organizational leadership. I have built a number of projects, which can be found on my Github, including a basic smart contract, a DAO app, a Dapp, a simple NFT, data churn analysis of hotel data, sentiment analysis of hotel data, and other coding experiences. Through these experiences, I have developed problem-solving and troubleshooting skills that have enabled me to tackle complex coding issues. Additionally, I have contributed to the open source blockchain community by writing articles that have been published on Medium, as well as by other editorials such as Coin Bench, Coin Monks, and Blockmagnates and participated in coding competitions on Code Wars and Hackerrank. My critical thinking, problem solving, and strong teamwork make me a suitable candidate for a Solidity Developer position. My coding and development experience, as well as my problem-solving and troubleshooting skills, make me a confident and capable Solidity Developer. My enthusiasm for learning, combined with my dedication and hard-working mentality, make me an asset to any team.

FROM: JAN 2016 TO: DEC 2022

JOB DESCRIPTION: As an IT Support Specialist, I was responsible for providing technical assistance and support related to computer systems, hardware, or software. Duties included responding to inquiries from guests, troubleshooting, diagnosing, and resolving technical issues, providing technical advice and guidance, and maintaining, configuring, building, and running the hotel's website and installing computer systems.

ACHIEVEMENTS:

1. - Data Science and Python sentiment analysis was used to analyze customer reviews of a hotel. The analysis provided an objective and unbiased view of customer opinions, which was then used to make changes to the hotel's services. These changes led to an increase in customer satisfaction and revenue, with the help of sentiment analysis to identify areas of customer dissatisfaction. Thanks to Data Science and Python sentiment analysis, the hotel was able to improve its services and increase its revenue by 15% at the end of the year.

2.

- Data churn analysis was conducted to increase revenue at a one-star hotel. Analysis of data from customers who had stayed at the hotel in the past was conducted to identify areas of dissatisfaction with services. Key factors that made customers dissatisfied were pinpointed and services such as in-room amenities, food, and customer service were improved. Loyalty programs were created to incentivize both new and repeat customers. The results of the analysis provided the hotel with valuable information which was used to increase revenue.

PHYSICIAN ASSISTANT, RIDGE REGIONAL HOSPITAL, ACCRA GHANA. From: Jan 2020 To: Dec 2022

JOB DESCRIPTION: As a Physician Assistant, I provided medical care services as part of healthcare under the direction of a physician.
